What is XTM Cloud?

An efficient and cost-effective translation solution.

XTM Cloud is an agile, enterprise-level translation management system (TMS) that enables companies to improve the management of localization processes.

Through automated workflow and CAT technology, XTM Cloud offers significant savings and quality improvements.

Who needs
XTM Cloud?

Enterprises

The ability to update and localize large volumes of content, quickly and easily, is business-critical.

Our innovative TMS and CAT tool help achieve this.

Localize documents, websites and apps - deliver your multilingual content faster and more cost-effectively.

Language Service Providers

Everybody wants to boost efficiency, reduce cost and save time. XTM helps you do just that by streamlining and speeding localization processes in innovative ways with absolutely no compromise to quality. Collaborate with co-workers and customers in real-time, at any location.

Freelance translators

Get started in minutes with a user-friendly environment. There's no software to install – all you need is a browser. Use the latest technology to translate and store your files and TM securely. Win more business by using XTM Xchange.

Our affordable system gives you the freedom to work the way you like.

XTM Cloud
