

Antenna House DITA Solution

DITA-OT + PDF5-ML + I18N Index Library + Antenna House XSL Formatter

PDF5-ML

PDF5-ML is an open source plug-in developed by Antenna House to produce PDFs with AH XSL Formatter. It is intended to replace PDF2, the default provided with the DITA Open Toolkit.

Why PDF5-ML is better than PDF2:

- Far less complicated
- Much easier to use
- More powerful
- Easier to change and modify

I18N Index Library

I18N Index Library is an independent Java plug-in expanded by Antenna House for sorting back of the book indexes for 31 languages. It can be used by other DITA Open Toolkit plugins to sort for different outputs including PDF, HTML and EPUB. Some additional benefits of I18N Index Library are:

- Support for over 30 languages, including Simplified and Traditional Chinese
- Supports DITA indexterm features
- Java based XSLT processors are supported

Antenna House DITA Solution

DITA-OT + PDF5-ML + I18N Index Library + Antenna House XSL Formatter

Antenna House XSL Formatter

For DITA, Antenna House XSL Formatter is the most powerful XSL-FO software for document formatting on the market. With Formatter, you are able to turn DITA content into high-quality PDF output. It is an important component of the DITA solution since it supports:

- 60+ Languages
- PDF 1.3-1.7, PDF/A-2, PDF/A-3, PDF/UA, PDF/X, Tagged PDF
- Streaming multimedia within PDF
- MathML V3.0
- Layered PDFs

Millions of Pages of DITA Content Formatted

See for yourself why Antenna House XSL Formatter is used by more DITA CMS vendors as their formatting component than any other software and why Antenna House XSL Formatter is used in hundreds of DITA solutions today.
