IXIASOFT CCMS

Take customer experience to the next level.

Create and deliver personalized customer content with IXIASOFT CCMS.

Made with love, made for DITA

IXIASOFT CCMS is a component content management solution designed to streamline your technical communication process. As an enterprise-class DITA CCMS based on the DITA standard, our solution can be tailored to meet your needs. We offer both on-premise and hosted deployment options.

Benefits for Everyone

EXCEED CUSTOMER EXPECTATIONS

Thanks to the granularity of structured content, you can deliver high-quality, personalized content to customers in any language on all platforms or devices.
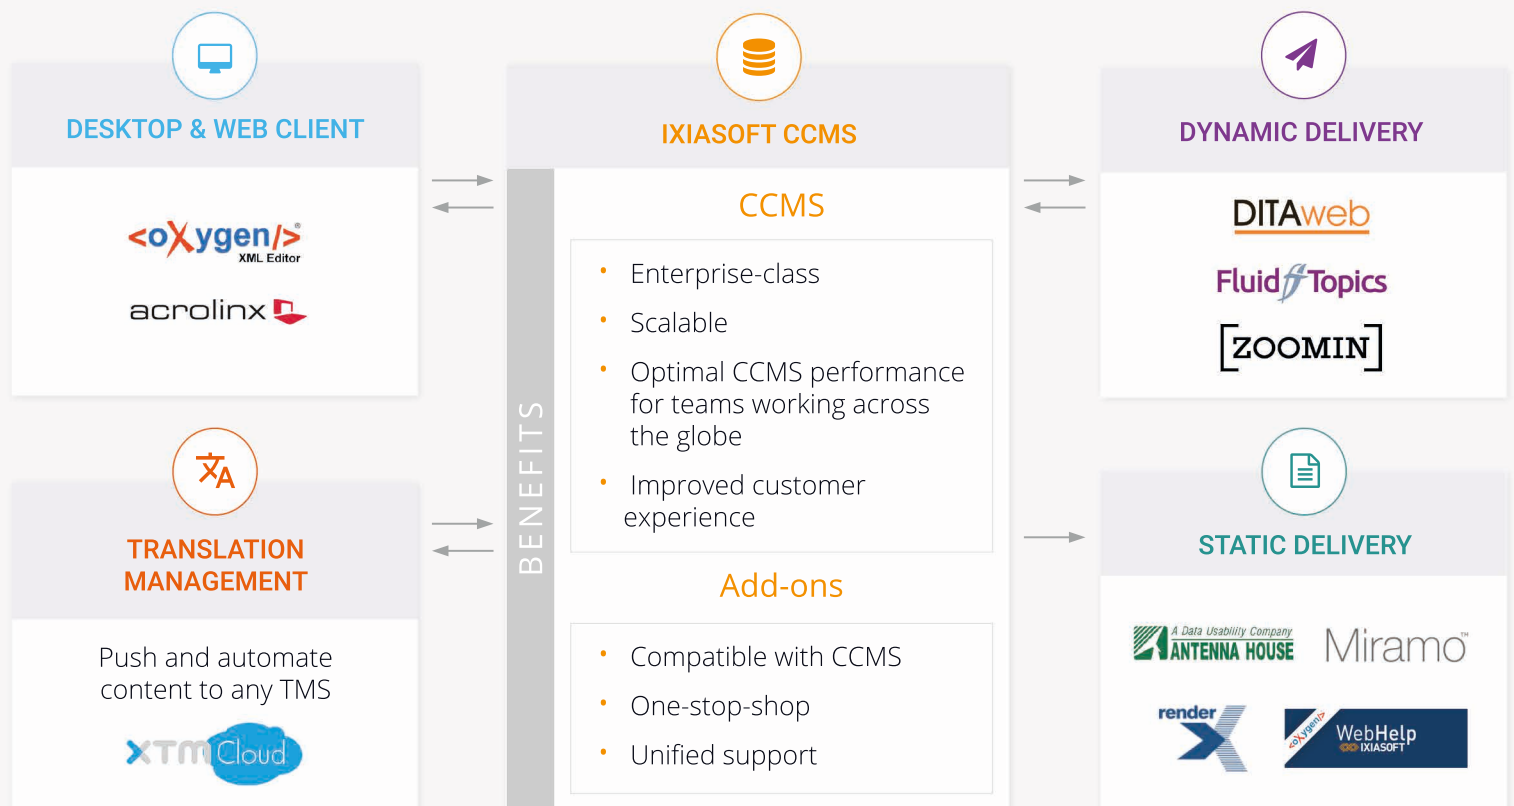

CROSS-FUNCTIONAL COLLABORATION

Teamwork is the secret to success. On a single platform, all team members, including authors, reviewers, SMEs, and localization managers can easily collaborate and contribute to technical content.

QUICKER TIME-TO-MARKET

Eliminate bottlenecks and increase competitive edge by optimizing your reuse strategy and by simplifying the management of multiple product releases with IXIASOFT CCMS.

UNLIMITED SCALABILITY

Whether operating a small or large technical communications team, you can rely on our CCMS for its flexibility, no matter how much your documentation needs may grow. IXIASOFT is proud to work with leaders in industries such as: software, medical devices, semiconductors, telecommunications and heavy manufacturers.
